SUMMARY

Data analyst working on international banking portfolios, where the job is usually to make a number both correct and readable by someone three timezones away. Five years building ETL pipelines, financial reporting automation and executive dashboards on Python, SQL and Power BI. I turn business questions into defensible recommendations, and document the process well enough that someone else can check it.

EXPERIENCE

Data Analyst (Financial Analyst) Oct 2024 – Present
Connext Global Solutions · Bucaramanga, Colombia

- Automated the generation of financial statements, waterfall models and cash-flow reports with Python, Advanced Excel and Power Query, removing the manual assembly those reports required every cycle.
- Built and maintain the executive dashboards — quarterly KPIs, payment distribution and covenant compliance — that stakeholders across several regions read without an analyst in the room.
- Ingest and transform origination data into an Azure SQL database, keeping the data intact end to end across the pipeline.
- Track financial covenants and payment allocations to cross-border originators, ensuring compliance with contractual obligations across international portfolios.

Data Analyst Apr 2021 – Dec 2023
Petrozones · Bucaramanga, Colombia

- Developed the Python ETL that extracted operational data from APIs and CSV files, cutting manual data entry by 50%.
- Designed and tuned the MySQL schemas and queries behind it, for faster retrieval as the data grew.
- Built interactive Power BI dashboards combining several sources, plus weekly business reports in Excel for operations and management.

EDUCATION

BSc in Computer and Information Systems Expected Dec 2026
Universidad Autónoma de Bucaramanga (UNAB) · Colombia

SKILLS

Technical	Python (pandas), SQL (Azure SQL, MySQL, DuckDB), Power BI (DAX), Advanced Excel (Power Query), ETL pipeline design and automation, data modeling, MongoDB
Practice	Stakeholder management, cross-functional collaboration, data governance, reproducible analysis, process improvement
Languages	Spanish (native), English (C1)
